# Overview and Tutorials

ArcGIS Online

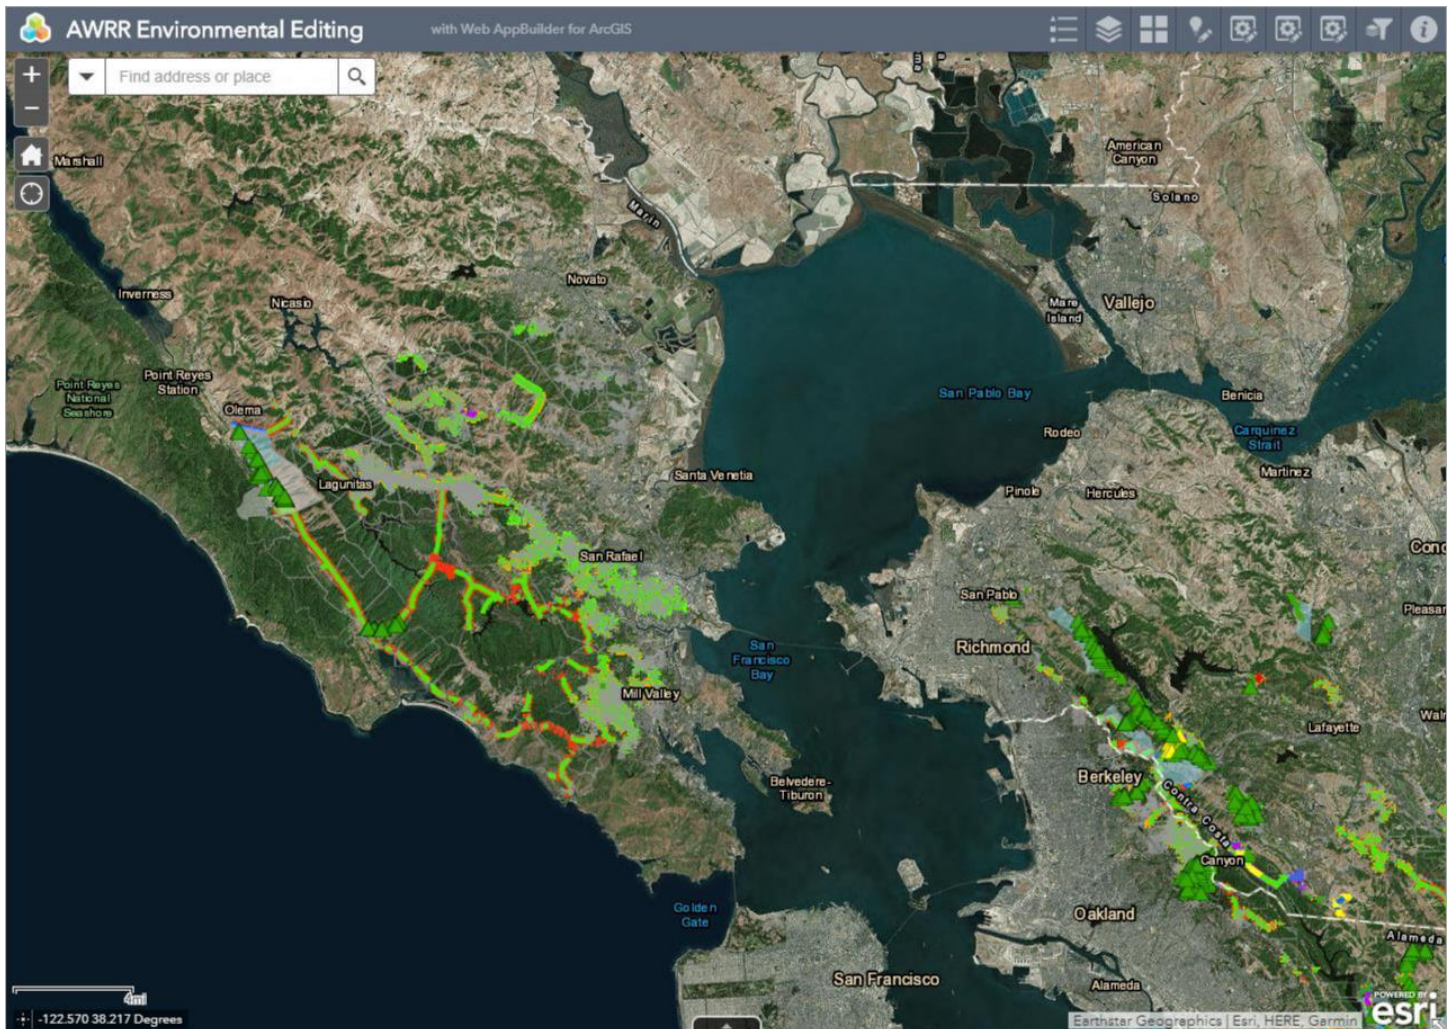

# Widgets and Tools

## Widgets and Tools

### Launching the App

Use the EVM Environmental Editing application to view or update on a desktop computer. The app is best viewed using the Chrome browser.

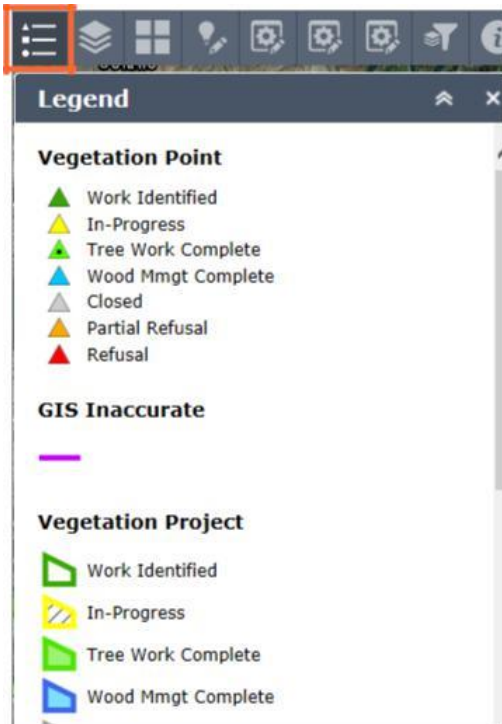

Use this link to access the app: <https://tinyurl.com/EVM-Enviro-Editor>

# Widgets and Tools

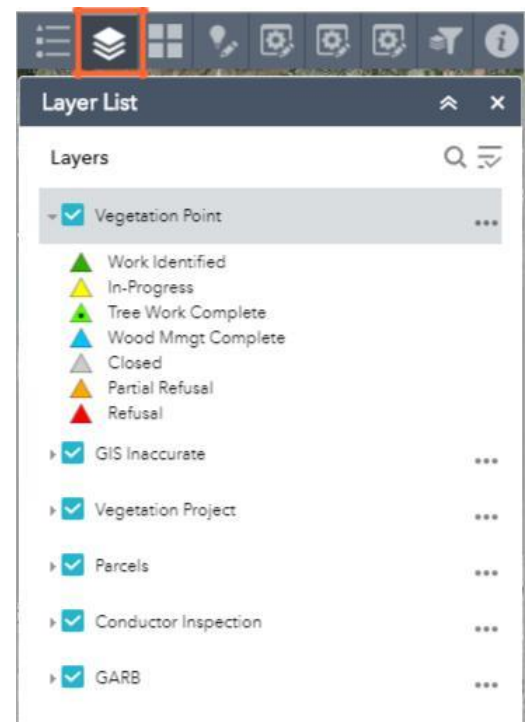

## Legend and Layer List

The Legend widget displays the map legend and the symbols and colors for each layer.

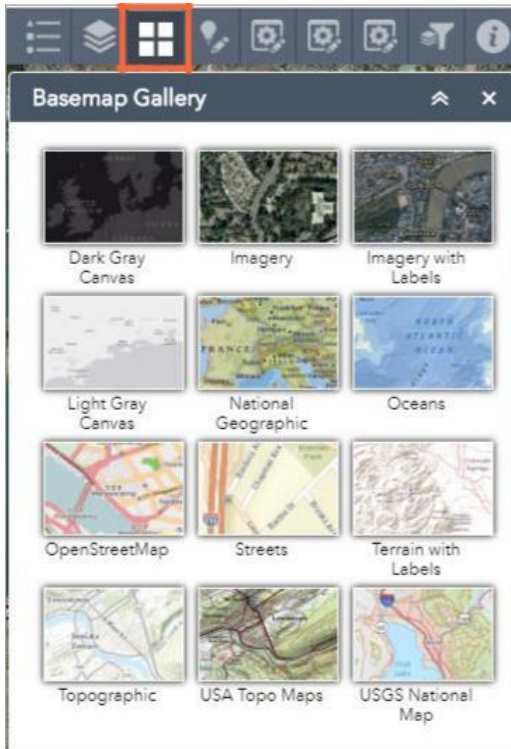

The Layer List widget displays all layers in the map.

- Click a layer checkbox to toggle it on or off.
- Click to expand a layer in the list to view its sublayers or subtypes.

# Widgets and Tools

## Basemap Gallery

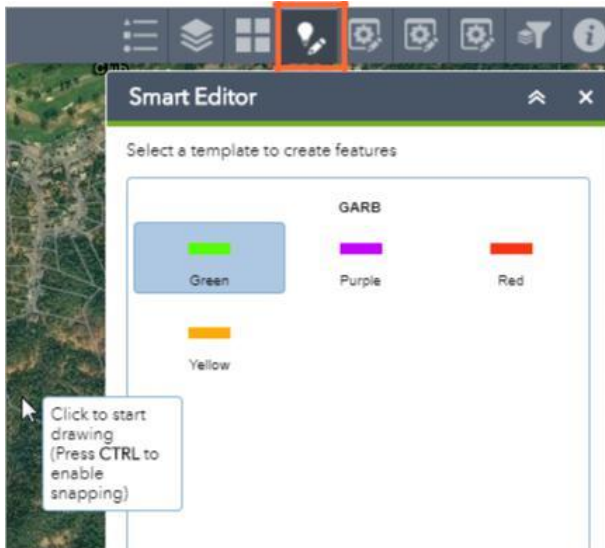

The Basemap Gallery widget provides the option to change the background of the map.

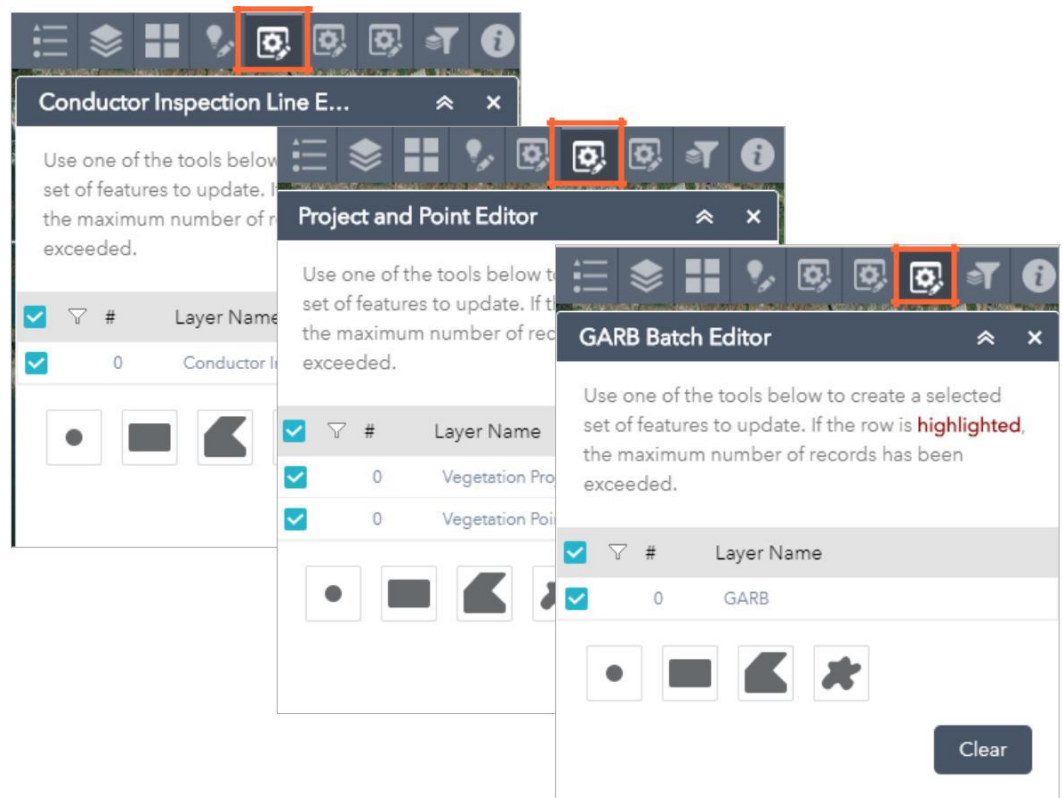

# Widgets and Tools

## Smart Editor and Batch Attribute Editors

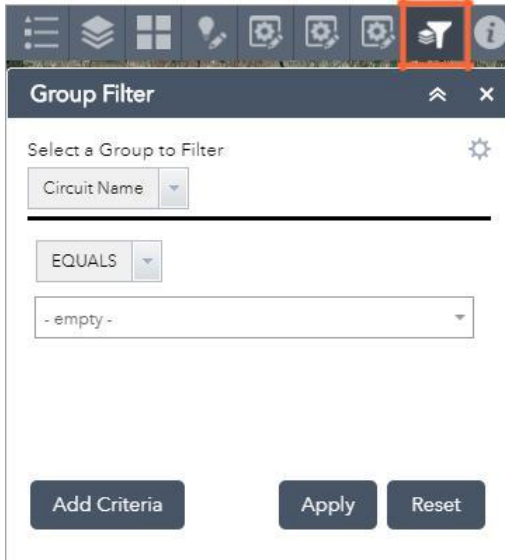

Use the Smart Editor to update the GARB layer on the map. . See instructions for ([Update GARB Layer](#))

Use the Batch Attribute editors to update attributes for a data group at the same time. There are batch attribute widgets for Conductor Inspection Line, Project and Point, and GARB. See instructions for ([Update Batch Attributes](#))

# Widgets and Tools

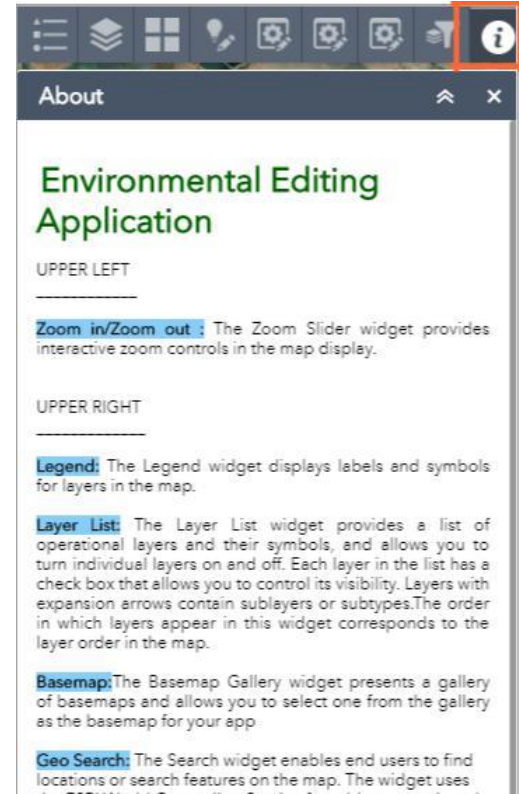

## Group Filter and Information Widgets

Use the Group Filter widget to apply a filtered view on a map based on one or more layers.

The Vegetation Point, Vegetation Project, GIS Inaccurate and Corridor Inspection layers have Circuit Name Group filter applied.

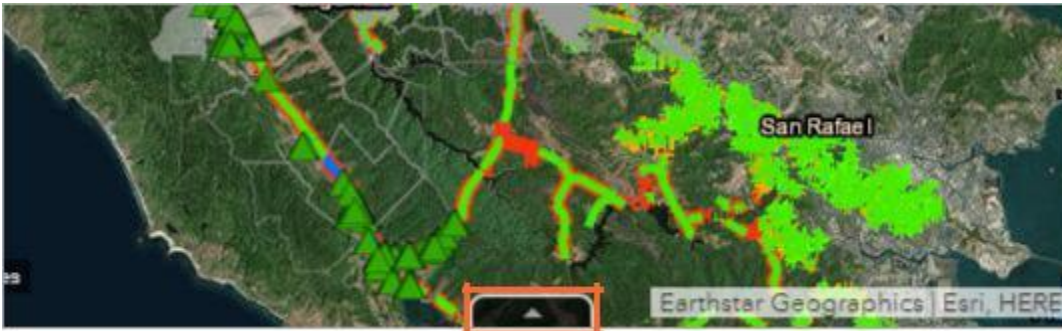

The Information widget provides details for each item in the map.

# Widgets and Tools

## Table View

Click the tab at the bottom-center of the screen to open Table View.

Vegetation Point												
Vegetation Project		Parcels		GARB								
Options		Filter by map extent		Zoom to								
				Clear selection								
				Refresh								
Status	PI LanID	Inspection Date	PI Company	PI_Comments	Veg Type	Species	Tree Diameter	Tree Height	Prescription	Underbuild	Coastal Redwood Excpn	Wood Manag
Work Identified		9/10/2018, 10:28 AM			Reliability Tree			0	Remove	No	No	Yes
		12/29/1899, 4:00 PM			Hazard Tree			0		No	No	Yes
In-Progress	dburbm_ewrr	9/12/2018, 2:20 PM			Hazard Tree	Redwood, Coast	R3 - 24-35.9	75	Remove	No	No	Yes

20578 features 0 selected

The Vegetation Point, Vegetation Project, Parcels, and GARB layers are viewable as a table. See instructions for ([Filter Table Data](#)).

# Functions

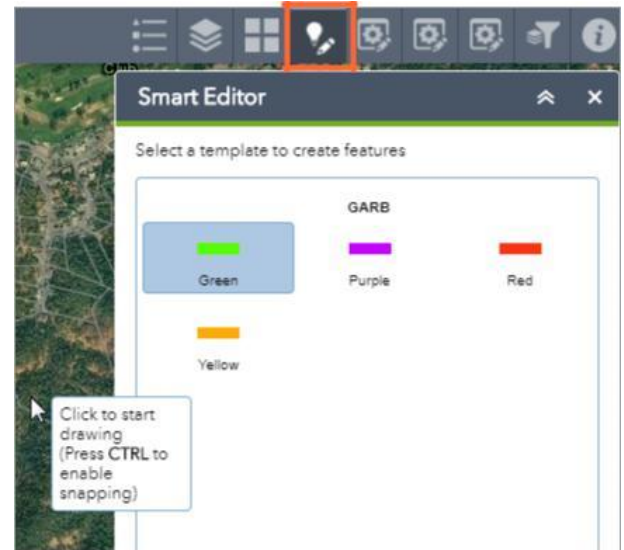

## Functions

### Update the GARB Layer

Use Smart Editor to edit the GARB layer and associated attributes.

To update the layer:

1. Locate the area on the map to update.
2. Click the **Smart Editor** widget.
3. Select a marker.
4. Click to start drawing the line. Drag the line to the end point and double-click to complete the line.

A screenshot of the Smart Editor widget showing the attribute form. The form has a title bar 'Smart Editor' with a close button. Below the title bar, there is a tab labeled 'GARB'. The form contains several fields: 'Status\_Color' (a dropdown menu with 'Green' selected), 'Comments' (a text area), 'Species' (a text area), 'Site\_Specific\_ERTC' (a text area), 'AMM\_Triggers' (a text area), and 'AMMs\_Triggered' (a text area). At the bottom of the form, there is a checkbox labeled 'Edit Geometry' and two buttons: 'Clear' and 'Save'.

5. Add attributes in the Smart Editor widget pane that opens.
6. Click **Save** to apply your changes.

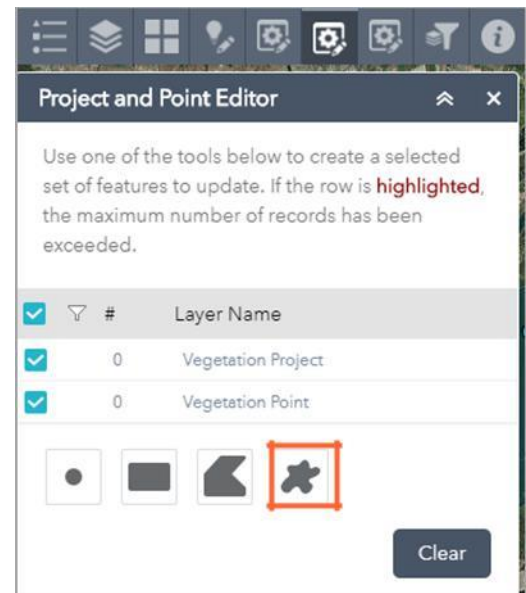

# Functions

## Update Batch Attributes

Use this option for updating attribute fields for multiple, selected map objects.

To update attributes:

1. Select the batch attribute widget.
2. Click a selection type. Each type draws a different shape on the map. The freehand polygon selection tool is recommended.
3. On the **Project and Point Editor**, you can optionally select to modify a single view by ensuring the blue checkbox is selected for the desired view.
4. Draw on the map to select the items to update.
5. Update the desired attributes. Each widget has different attribute options..
6. Click **Save** to apply your changes.

These are the batch attributes you can update for each view type.

Inspection Status	Inspection Needed
Inspection Date	12/29/1899
Inspector LanID	
Comments	Keep Existing Value

Save

Encroach. Permit	N/A
Permit	N/A
AMMs	N/A
BMPs	N/A

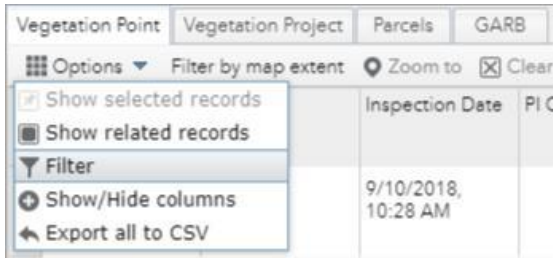

Save

AMM_Triggers	Keep Existing Value
AMMs_Triggered	Keep Existing Value

Save

# Functions

## Filter Table Data

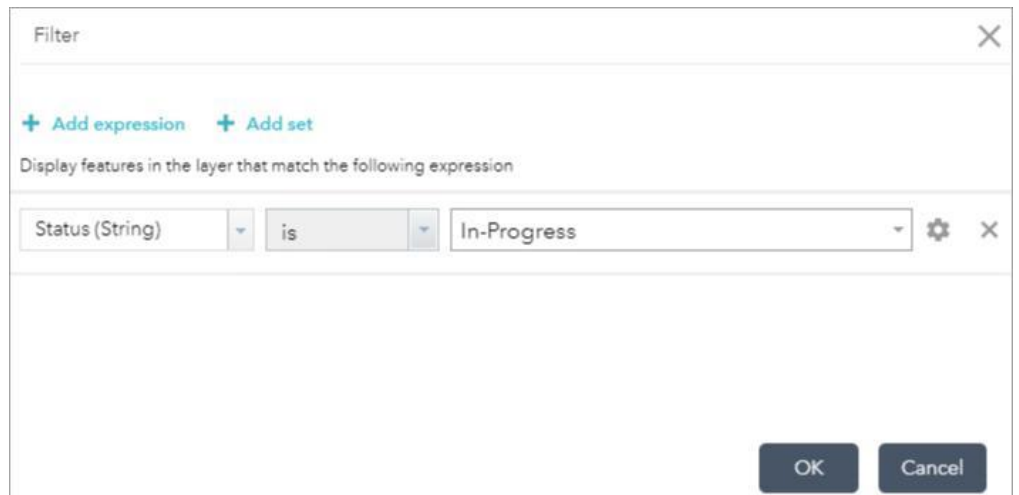

To open the filter view:

1. Select the desired layer view. Only one layer can be filtered at a time.
2. Click the **Options** button.
3. Select **Filter**.

To create a filter:

1. Click **Add expression**.
2. Select a Field from the first drop-down.
3. Select a filter Expression from the second drop-down.
4. Click the settings icon  and select **Unique** to set the values of the search field.
5. Select the search term or value from the third drop-down.
6. Click **OK** to apply filter.
7. To clear the filter, click the delete icon  in the filter window.

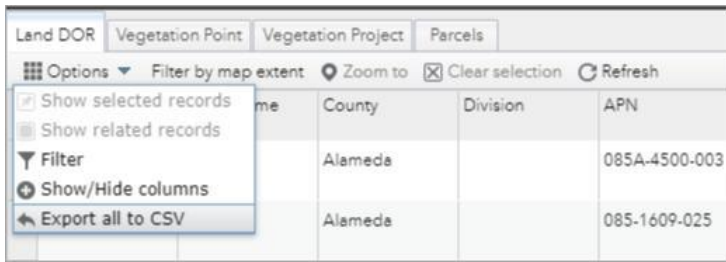

# Functions

## Export Table to CSV

Use the export feature to save a data file to import into an Excel Workbook.

To Export to CSV:

1. Click the **Options** button.
2. Select **Export all to CSV**.
3. Click **OK** when prompted to, **Export data to CSV file?**
4. Save the file to your computer and open in Excel.
