# Overviews and Tutorials

ArcGIS Collector

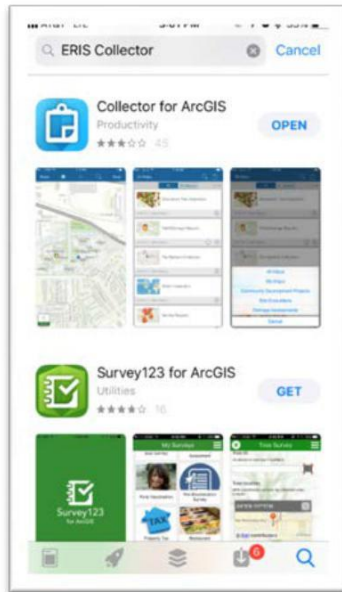

# How to Open ArcGIS Online

## Overview

### Summary

Below are step-by-step instructions for downloading, signing-in, and launching the ArcGIS Online app.

#### 1. If needed, download Collector App by searching ESRI Collector in the App Store.

#### System Requirements:

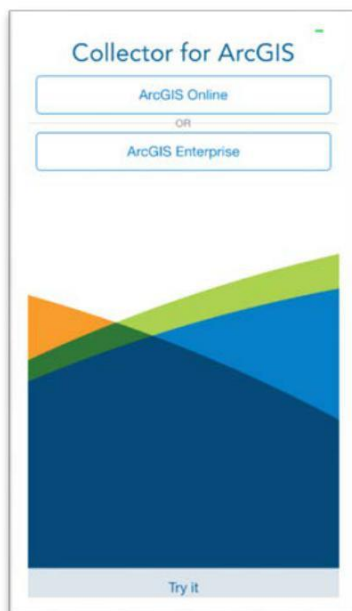

##### Android

- Android 4.2 (Jelly Bean) or later
- Processor: ARMv7 or later, or x86
- OpenGL ES 2.0 support
- Precise location (GPS and network-based) support

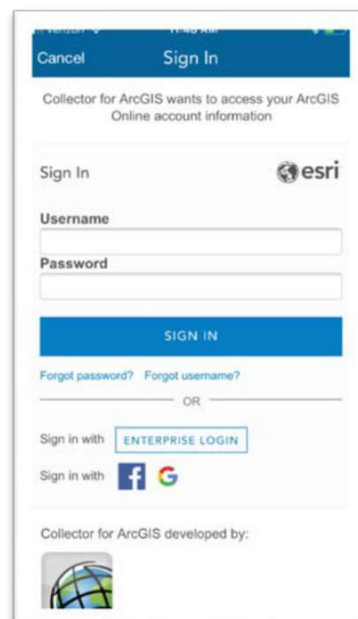

##### iOS

- iOS 8 or later
- iPhone, iPad, iPod touch

#### 2. Start Collector App and sign in to ArcGIS Online.

Select ArcGIS  
Online

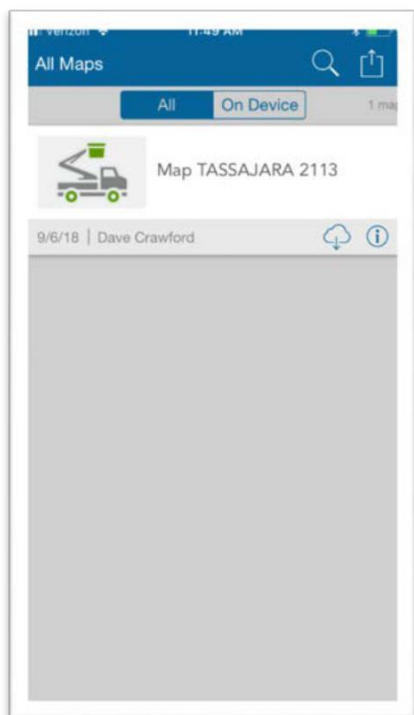

Sign-in

# How to Open ArcGIS Online

## Overview

3. Choose a map to work in.

4. The map will open and center on your location.

### GPS On

When the 'Current Location' icon is highlighted white, the GPS finder is on.

### GPS Off

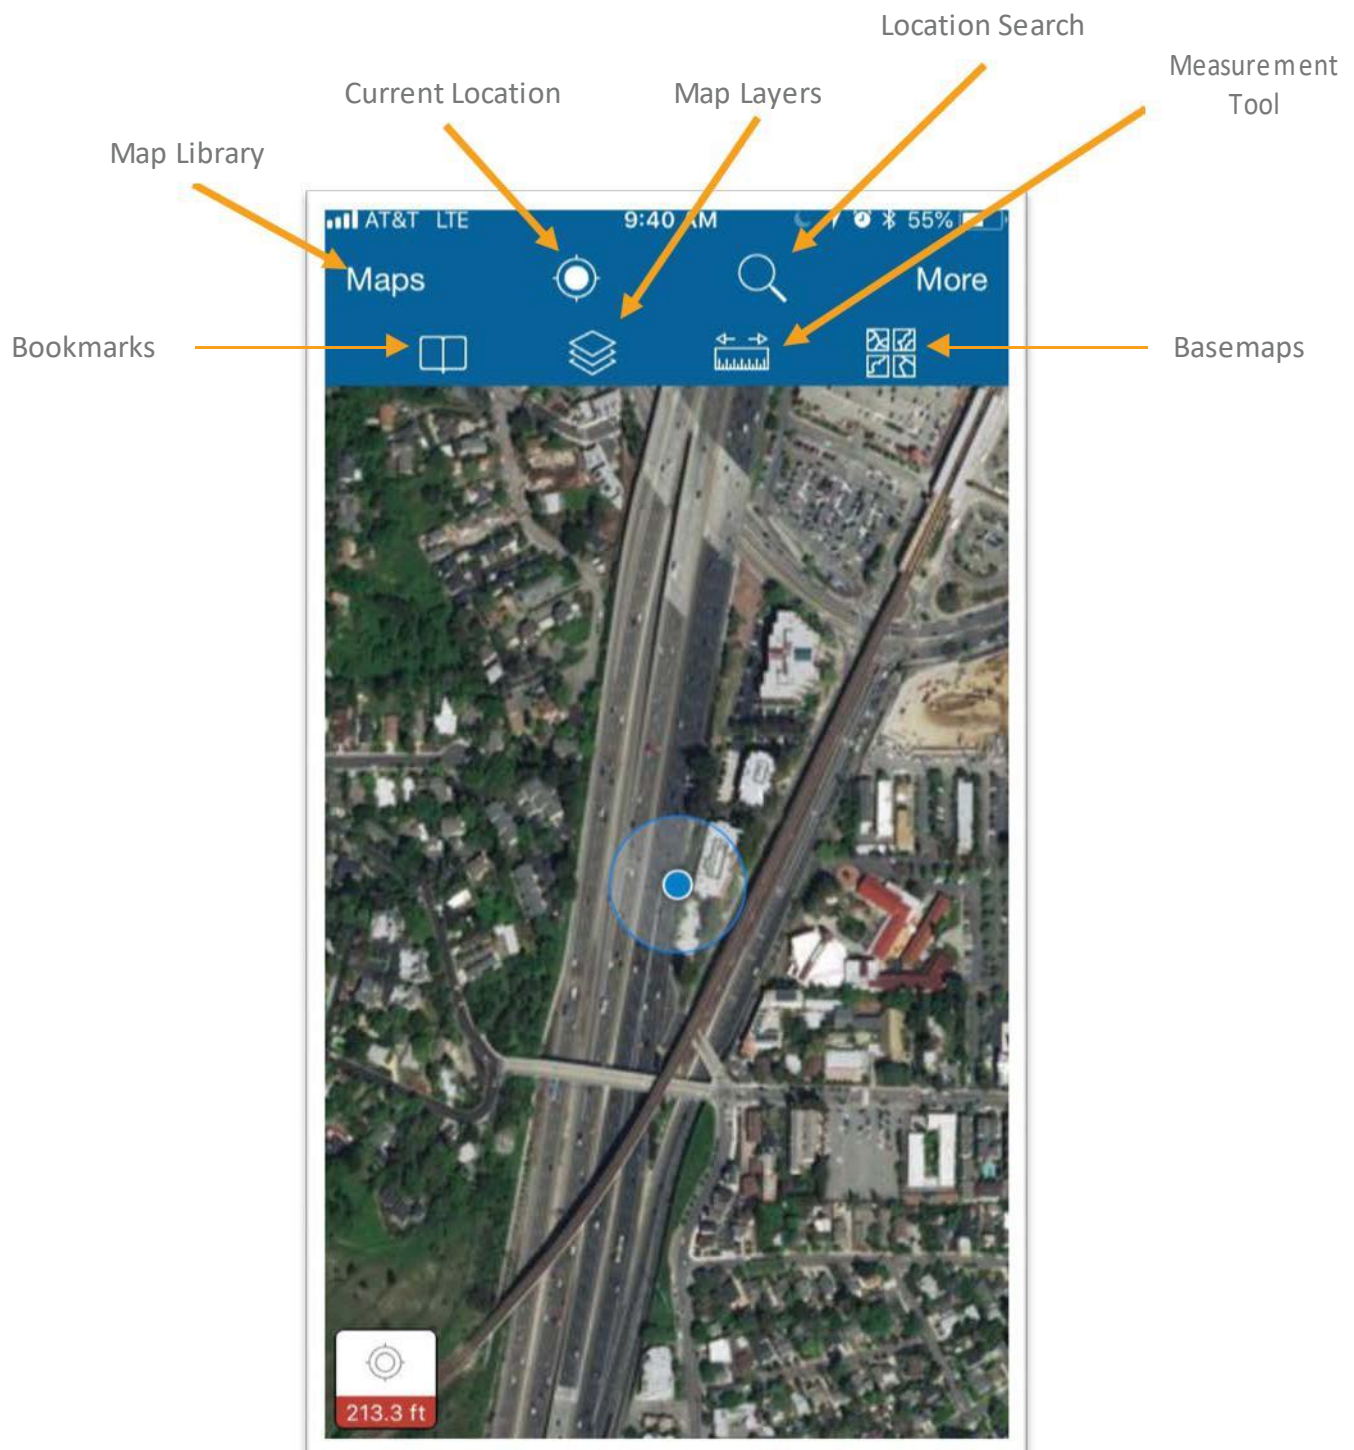

When the icon is not highlighted white, the GPS tracker is off.

# Home Screen Menu

## Overview

### Summary

This is an overview of the ArcGIS Online for mobile interface.

# Home Screen Menu

## Overview

	<b>Map Library</b>	Navigates users back to the Map Library
	<b>Current Location</b>	Center map on your current location
	<b>Bookmarks</b>	Access your bookmarks
	<b>Map Layers</b>	Access Map Layers List
	<b>Location Search</b>	Search for addresses and locations
	<b>Measuring Tool</b>	Access Measurement Toolkit
	<b>Basemaps</b>	Access to Basemap Library
	<b>Add a feature</b>	Create new point, polygon, or line
	<b>Accuracy Integration</b>	Horizontal and Vertical Accuracy

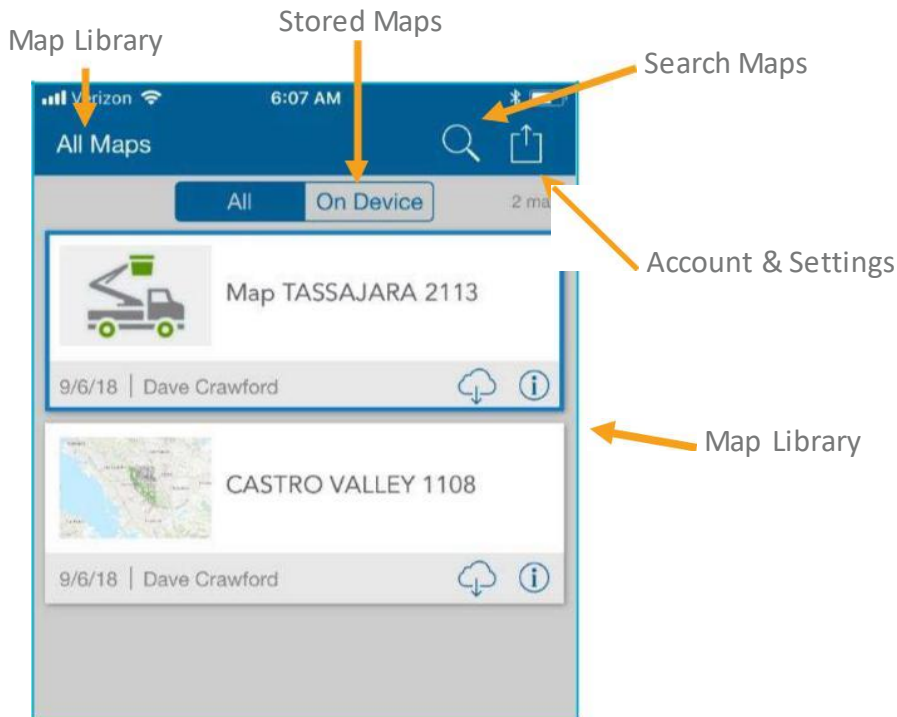

# Map Library

## Overview

### Summary

This is where all your maps are stored. You'll have the option to store the map on your device.

### Map Library Toolbar

### All Maps

Navigates users back to the Map Library

### Stored Maps

Toggle between Cloud-Based and On Device

### Search Maps

Search through Map Library

### Download to Device

Store Maps on Device for 'offline use'

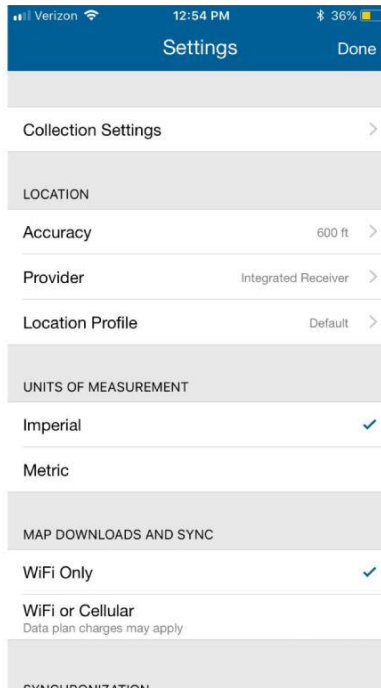

### Map Details

View map and survey details

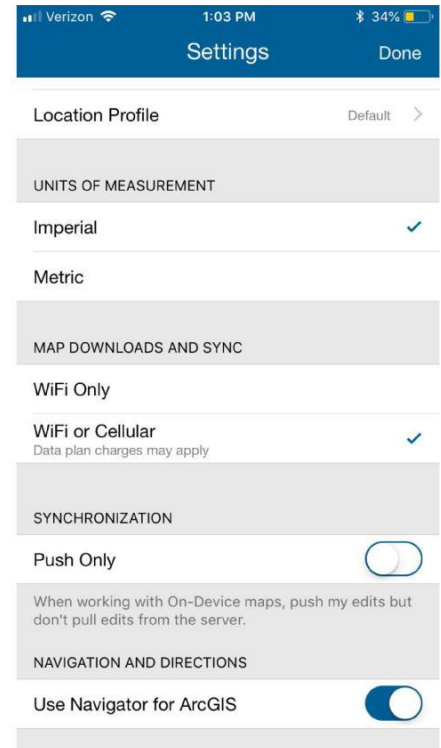

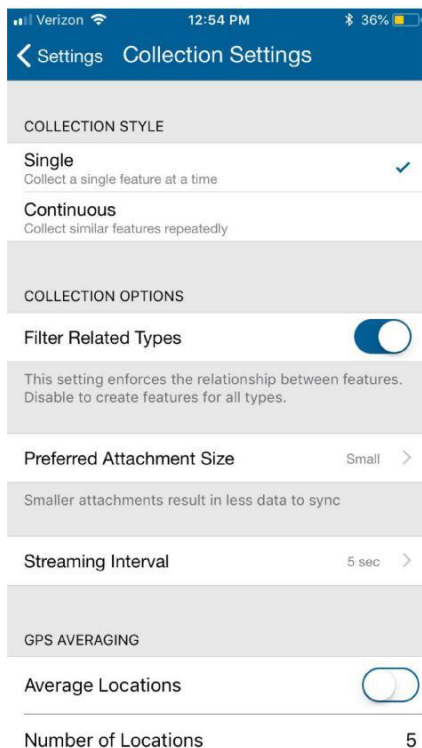

# Map Library

## Overview

- ☐ Attachments should be saved as a small file type.
- ☐ Syncing of offline data should be available via wifi or cellular data.
- ☐ These can be configured in settings on the home screen.
- ☐ Open Settings and click on Collection Settings.

Open Preferred Attachment Size

Choose small attachment size.

Choose Wifi or Cellular for Syncing

# Map Layers and Basemaps

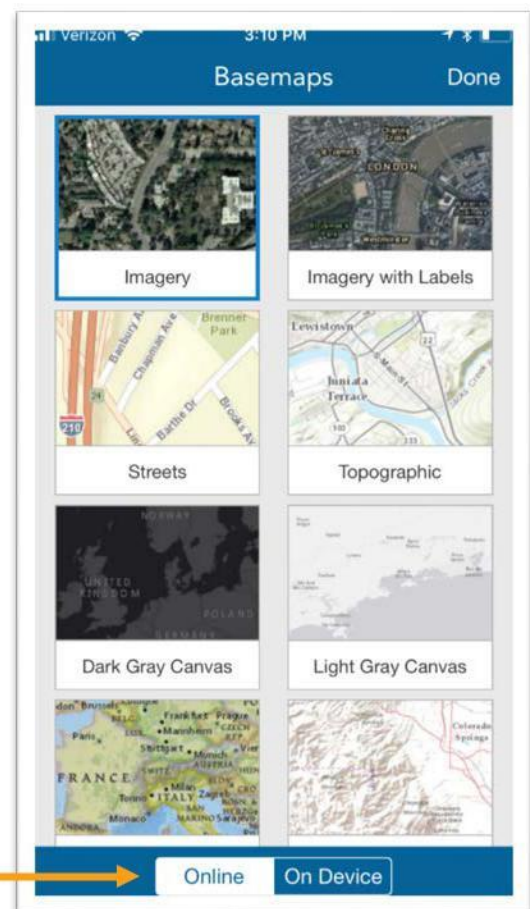

## Overview

Layers	Done
<input checked="" type="checkbox"/> Vegetation Point	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Conductor Inspection	<input checked="" type="checkbox"/>
<input type="checkbox"/> GARB	<input type="checkbox"/>
<input checked="" type="checkbox"/> GIS Inaccurate	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Vegetation Project	<input checked="" type="checkbox"/>
<input checked="" type="checkbox"/> Parcels	<input checked="" type="checkbox"/>

The available layers to view are 'GARB', 'Vegetation Point', 'Vegetation Project', 'Conductor Inspection', 'GIS Inaccurate', 'Parcels'. If the blue circle to the left of the layer option is checked and blue, the layer is turned-on and will appear on the map.

If connected to WIFI or mobile data (not working 'On Device') you can access any ESRI basemap at any time. While connected to WIFI or mobile data, you can store basemaps to be used when working 'On Device'. This is where you can change the display type of the map that appears on your screen.

Online/On  
Device Toggle

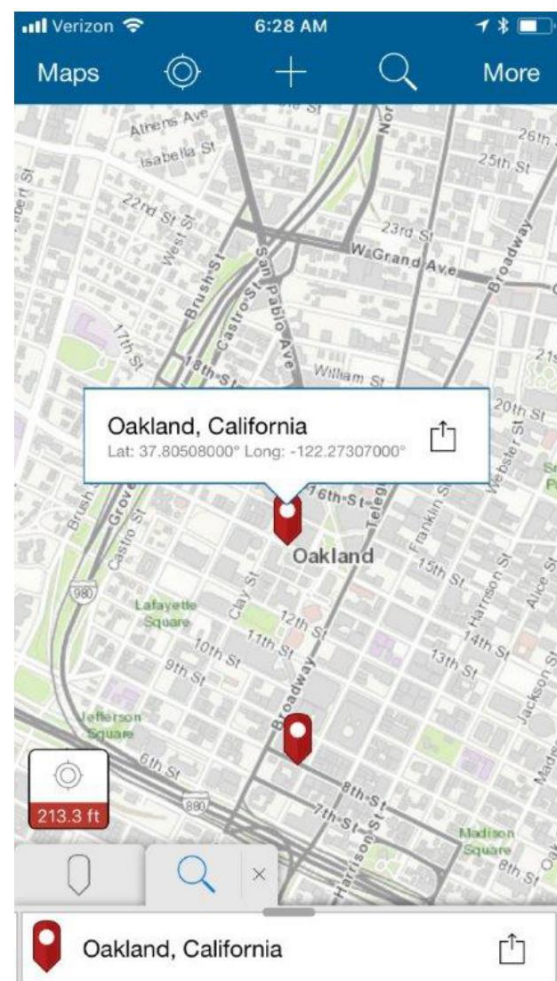

# Location Search

## Overview

### Summary

This is where you can search for places or addresses. Once you enter the place or address you would like to locate, the map will adjust accordingly.

# Adding Data

ArcGIS Collector

# Symbols

## Legend

### Summary

Below are the meanings of the symbols and colors that are seen throughout the map as you input the information for each layer. These are based off of the Fuel Reductions Standards.

#### 1. EVM Parcels

The first layer that will be updated will be the EVM Parcels.

#### 2. Start Project

The second layer that is updated is the 'Start Project' layer. This layer is used to add a Vegetation Project or to Add a Vegetation Point.

##### Vegetation Project

##### Vegetation Point

#### 3. Conductor Inspection

The last layer that will be updated after the inspection complete, is the Conductor Inspection Layer.

#### 4. GIS Inaccurate

If necessary, a GIS Inaccurate line can be added if the line in GIS is not consistent with the line in the field.

#### 5. GARB

GARB is an environmental reference layer. See more details on page 17.

# Parcels

## Map Layers

### Summary

The 'Parcels' layer displays the details for each property based on the project assigned. The details can be accessed for each Property by selecting the 'Details' icon.

Details Icon

Map		Details	
		<div>Area</div> <div>2.683 acres</div>

		Owner Phone	

# Vegetation Point, Vegetation Project

## Map Layers

### Vegetation Point/Vegetation Project

To view Vegetation Points and Vegetation Projects, select 'Vegetation Point' or 'Vegetation Project' from the Map Layers menu. After selecting the Vegetation Point or Vegetation Project, it will open up the screen with all the fields that need to be completed. After completing the required fields, click 'Update' to finish.

# GIS Inaccurate

## Map Layers

### Summary

GIS Inaccurate is used when the electric line in the field is different than it is in GIS. if the line is inaccurate in GIS, it will be displayed as new line segment as shows below.

# Reference Layers

ArcGIS Collector

# GARB Environmental Layer

## Map Reference Layers

### Summary

GARB is a reference layer visually displaying environmental information on the line as well as where there may be additional constraints.

GARB

Green

Red

Yellow

☐ Green: Cleared with Standard BMPs – okay for ground to sky. Apply the Green Environmental Release to Construction (ERTC)

☐ Red: Agency land: Do not work. Permit Required. Consult with Environmental Lead.

☐ Yellow: Caution: Conductor to sky only. Specific AMMs may apply. Amber ERTC can be obtained from the Environmental Lead.

Layers	Done
<input type="checkbox"/> Vegetation Point	<input checked="" type="checkbox"/>
<input type="checkbox"/> Conductor Inspection	<input checked="" type="checkbox"/>
<input type="checkbox"/> GARB	<input type="checkbox"/>
<input type="checkbox"/> GIS Inaccurate	<input checked="" type="checkbox"/>
<input type="checkbox"/> Vegetation Project	<input checked="" type="checkbox"/>
<input type="checkbox"/> Parcels	<input checked="" type="checkbox"/>

The GARB layer is not turned on upon login.

Open Layers to turn on the GARB layer.

# GARB Environmental Layer

## Map Reference Layers

Once the GARB layer is turned on it will be visible over the Conductor Inspection Layer.

GARB is for reference only and will not be editable.

# Upload and Sync Offline Maps

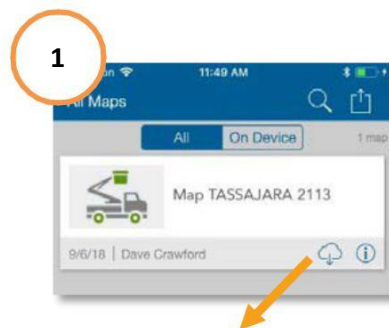

ArcGIS Collector

# Upload/Sync Offline Maps

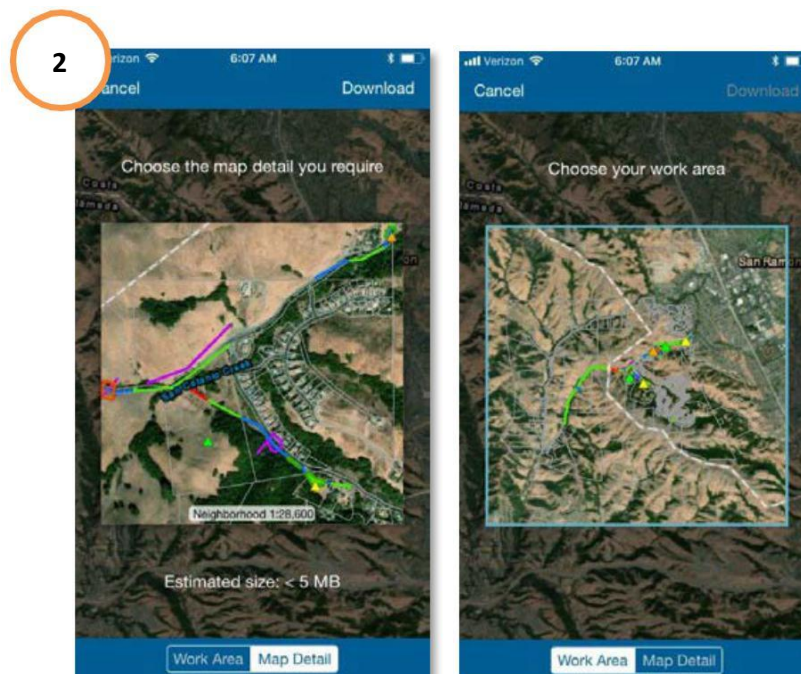

## Summary

If you are working in a remote area with limited cellular service, you can download a map to work offline to work 'On Device'. If offline or working 'On Device', after you have re-established cellular service, you will need to go back to the 'Maps' menu under 'On Device' and click the up/down cloud icon with the red number (indicating the number of features that have not been uploaded to ArcGIS Online) and select the cloud to submit and sync these features to ArcGIS Online. This requires cellular data or WIFI connection.

## Downloading a map for offline use

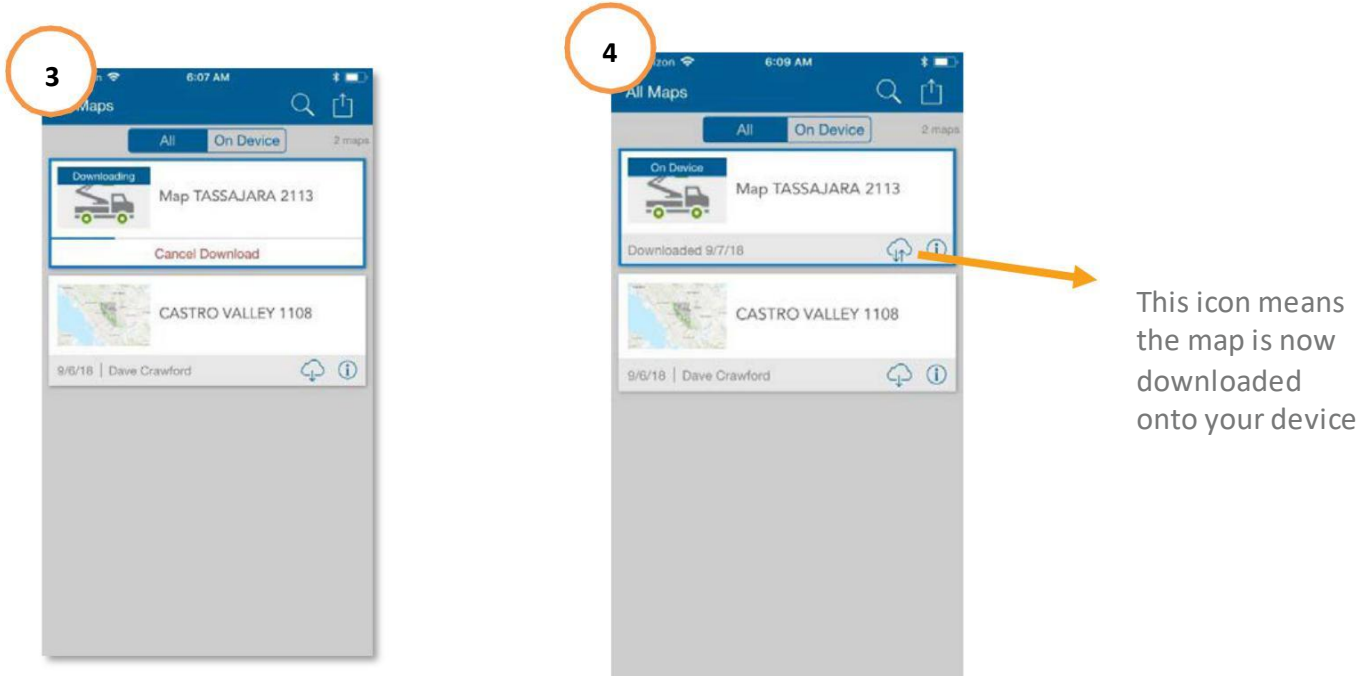

Click on the  icon to download the map.

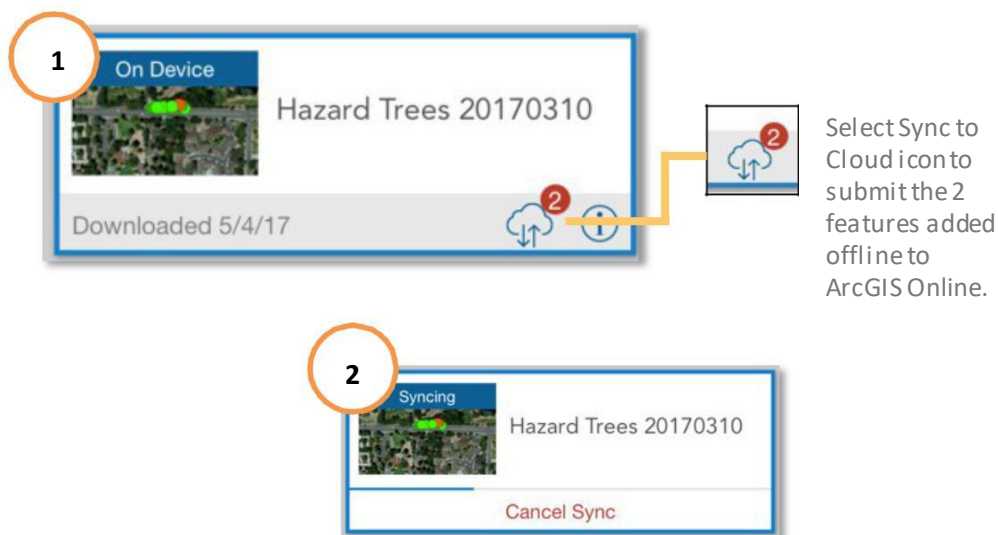

# Upload/Sync Offline Maps

## Syncing your offline activity

If you are working offline or 'On Device', be sure to sync your data once you have re-established either cellular service or have a WiFi connection. Once you have finished syncing all your offline maps, you can delete the saved maps from your device.

# Upload/Sync Offline Maps

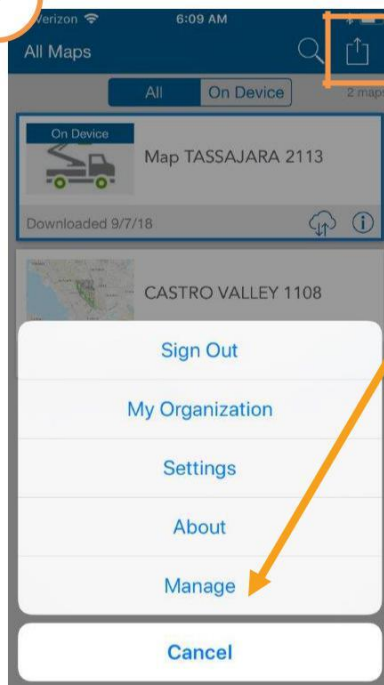

3

The notification number will disappear once synced. The time and date is feature in the bottom left corner.

If you are working online, connected to ArcGIS Online with WiFi or cellular data, you do not need to sync because it is done every time you select submit.

4

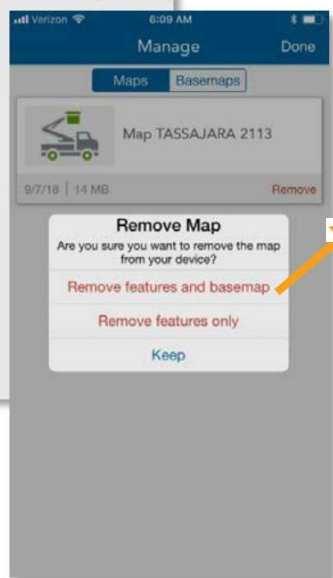

Click here and select "Manage" to delete the map off of your device once you have completed synced to ArcGIS

5

Select "Remove"

Select "Remove features and basemap" to delete the map from your device
